Course Title : English

Course Code : FEG - 02

Assignment No. : BCA(1)/Q2 / 2020-21
Universe (Unknown)

1. Outer Space : Introduction

- (i) Contain hard vacuum with low density of particles.
- (ii) Radiation from Big Bang & 7 kelvins (-270.45°C ; -454.81°F)
- (iii) 90% of mass-energy observable is dark energy.
- (iv) Galaxies and star system are just empty space

2. Begin of Outer space

- (i) Karmen line, at altitude of 100 km (62 mi) above sea level.
- (ii) International space established by Outer Space treaty on 10 October 1967.

3. Human exploitation on Outer space

- (i) human exploit space with high altitude Balloon flight.
- (ii) Manned Earth orbit achieved by Yuri Gagarin of Soviet Union in 1961.
- (iii) Manned Earth orbit has limited Earth orbit and moon.

4. Effectivity on Human

- (i) Environment are hazards of vacuum & radiation
- (ii) Microgravity have negative impact on human.
- (iii) Health & environment issue cost putting object into space is very high

Date.....

Summary

Outer space is expanse that exist beyond earth. Outer space is not empty it contain hard vacuum containing low density particles. Temperature of outer space set from radiation 2.7 kelvin (-270 temperature). plasma between galaxies about half baryonic matter universe. Studies indicate 90% of most galaxies unknown. Star and galaxies consist almost entirely of empty space.

Karman line is altitude of 100km above sea level, framework of international space established by outer space. Draft of UN resolutions are set for peaceful uses of outer space.

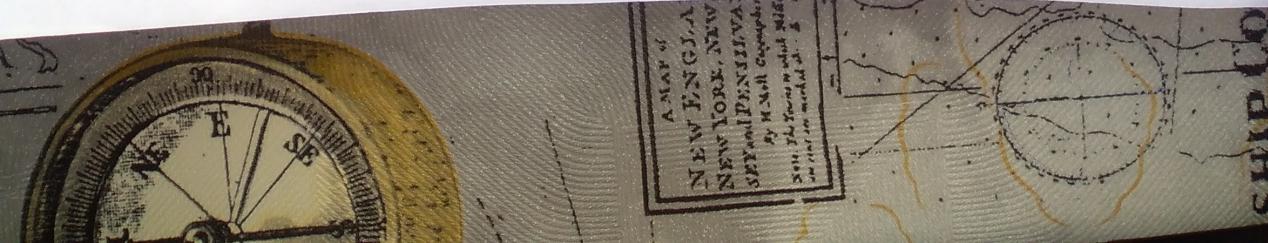

human explored space by balloon flight. Due to high cost of getting into space, manned space, space flight.

Outer space challenging environment for human exploration because of hazard vacuum & radiation. These also called health and environmental issue.

Ans 2) Paragraph

Kindness

Kindness is one of the Seven virtues. The right and loving attitude of to other people can be defined. Kindness is a sign that deaf people can understand and blind people can see.

Date.....

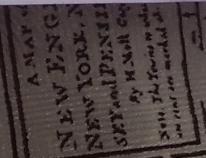

Adolescence is an action, which spread joy, pleasure without boundaries, universal joy.

Nature is so kind to us that it helps ~~in~~ civilization flourish. Nature has its own way to express thanks and kindness.

Kindness is our fundamental motivation behind nature. Every religion teaches goodness. In special situation, love is not a virtue to be adopted or showcased. But in all areas of life it can be very well adjusted. Showing kindness to neighbors and fellow workers contributes to developing a positive social environment. Even the little decision and selfless acts of kindness can contribute to creation.

Environment over the

This world gives a positive impression of being kind to others, making is a better place to live.

Interview with Sportsperson

Today we have sportive, dynamic personality, Mr. Abhinav Bindra, who won India's Olympic gold medal in the shooting event in 2008.

Interviewer: Abhinav, it is privilege for us to be able to interview you. In a country where you did not have any example of an individual winning the Olympic gold medal in a major Convention start?

Interviewer: How and when did you take up shooting, and what made you such a perfectionist?

Interviewer: How do you plan to use your popularity to inspire the youth to excel in different sports?

Interviewer: Would you say Athens 2004 was the low point in your life?

Interviewer: Sports, in India, is not a career option for most people. Very few dare to take specialized sports training leaving behind traditional studies. If given all the powers what changes would you bring to the sports government of India?

Interviewer: In what ways did your life change in India after winning the Olympic gold?

Interviewer: Please tell us about the role of your parents in your success.

Interviewer: Do you have any heroes and role models that you look up to, outside your family and outside your sport?

Interviewer: Finally, what would you say to Indian athletes, particularly shooters, looking up to you?

Beauty of Nature

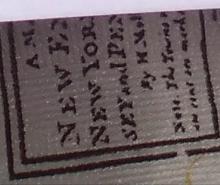

"I declare this world is so beautiful that I can hardly believe it exists." The beauty of nature can have a profound effect upon our senses, those gateways from the Outer world to the inner, whether it results in disbelief in its very existence as Emerson notes, or feelings such as awe, wonder, or amazement. But what is it about nature and they are beautiful?

One answer that Emerson offers is that the simple perception of natural forms is a delight. When we think of things that dazzle the senses - the prominence of a mountain, the expanse of the sea, the unfolding of the life of a flower. Often it is merely the perception of these things itself which gives us pleasure, and this emotional or affective response on our part seems to be crucial to our experience of beauty. So in a way there is a correlate here to the intrinsic value of nature, Emerson says:

66

The sky, the mountain, the tree, the animal, give us a delight in and for themselves"

"The inhabitants of the cities suppose that the country landscape is pleasant only half the year... To attentive eye, each moment of life has its own beauty and in some field it beholds the beauty in nature."
